

such that said cooperating structures in said cooperating pressure applying position thereof apply pressure to said master and feed materials as they advance therethrough so as to bond said adhesive to said master.

48. (New) A method according to claim 47, further comprising, prior to said advancing of said selected substrate, inserting said master between said first and second feed materials and said cooperating structures while said first and second outer shell portions are in said closed position thereof and said cooperating structures are in said cooperating pressure applying relationship thereof.--

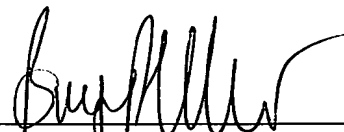

**REMARKS**

The foregoing amendment cancels claim 1 and adds new claims 36-48.

An early and favorable action on the merits of this application is respectfully requested.

Respectfully submitted,

Pillsbury Madison & Sutro, LLP
